Pest Control Services

ADDENDUM NO. 1

March 15, 2016

The Transit Authority of the City of Omaha d/b/a Metro hereby issues this Addendum to clarify information from the solicitation document and distribute information from the Pre-Submission Conference to all interested parties prior to the due date. This addendum forms a part of the Contract Documents and clarifies or supersedes the original documents released on February 26, 2016. The proposer shall acknowledge receipt of this Addendum on the form provided in Attachment D of the solicitation.

Reflective clothing and/or safety vests shall be required of all Contractor employees while on any Metro property.

The admin/maintenance facility is open 24/7, but most as needed services shall be requested during normal business hours (8am to 4:30pm) within an industry accepted response time (generally within 1-2 business days).

As a clarification of the scope of work in the unit price for the interior of Metro's administrative/maintenance facility, the treatment area shall be limited to "problem" areas, not the entirety of the building. The location of "problem" areas and subsequent treatment within the facility may likely vary and/or fluctuate. An approximate treatment area of 100 linear feet will be considered as one unit cost for treatment (per visit) in Metro's administrative/maintenance facility. Visits to the admin/maintenance facility are as requested by authorized Metro staff, but are anticipated for approximately once per month.

The deadline for bids as well as the public sealed bid opening has hereby been extended to 10:00 a.m. CST, on Thursday, March 17, 2016. The location of the bid opening will remain the same at 2222 Cuming Street, Omaha, NE.

The Sign-In Sheet from Pre-Submission Conference is attached.
