

# WELCOME ABOARD

ORBT is a high-capacity bus rapid transit service that will offer many of the time-saving features of light rail without the added cost of tracks in the ground. We're starting on Dodge Street, where we can make the biggest impact in the fastest way possible.

With compressed natural gas (CNG) powered vehicles serving stations every 10 minutes

during rush hour, ORBT will help people visit diverse destinations along the route: education centers, employers, medical facilities, recreational venues, and retailers.

The impact is wide-reaching — **the permanence of bus rapid transit stations has been proven to accelerate investment in the places around them.** ORBT is no different —

every dollar invested will bring more than \$8 of reinvestment to the metro area.

**No matter how you get around town, Metro is making a real impact on your life** because more riders means fewer cars on the road. So, your commute is faster, our roads are safer, and our collective carbon footprint is smaller.

**RIDE  ORBT.COM**

### ***SHORTER WAIT TIMES***

Vehicles will arrive every 10 minutes during rush hour, so the next bus will always be coming soon!

### ***REAL-TIME UPDATES***

Station signage and a smartphone app will track vehicle arrival times using GPS technology.

### ***PREPAID BOARDING***

Riders will be able to buy a ticket at the station, use a smart card, or pay with a smartphone!

### ***BICYCLE AMENITIES***

Bike parking and Heartland B-cycle will be available at stations, or riders can bring bikes onboard!

### ***FREE WI-FI***

Wi-Fi at every station will keep riders connected while they wait.

### ***UPGRADED STATIONS***

Raised platforms for level boarding will make it easy for all riders to get onboard.

### ***TRAFFIC SIGNAL PRIORITY***

Technology at major intersections will allow traffic signals to stay green longer for buses.
